

Harmony House

for Women

our house

Established in 2003; Harmony House is a women's alternative living facility geared toward providing its residents with a safe, drug-free environment in which to recover. It is our hope that we, the staff and supporters of the house, will be able to help you along in your transition from alcohol and/or drug addiction to a fulfilling life as a productive member of society. Our sole intent is to provide clean and affordable housing coupled with a certain degree of structure to any woman who decides that she is ready and willing to change her life for the better.

commitment

Our experience in running structured living environments over the years has helped us in implementing a reasonable system of rules which you will be asked to follow if indeed you decide to become a resident of the Harmony House. For your protection, we strictly uphold a no tolerance policy toward drug and alcohol use. At the end of the day, we find that it all comes down to respect: if you show respect for yourself, your recovery, and your housemates; you will more than likely to do very well here.

house rules
